

RESULTS WOULD BE DISASTROUS

German Protest Against Surrender of 800,000 Milch Cows to Allies.

DEATH SENTENCE TO MANY

Berlin, Dec. 20.—Surrender to the allies of 800,000 milch cows which have been demanded under the terms of the Versailles treaty, would have disastrous results in Germany, says a letter to the women of France from a committee of German women. Continued deprivation of the German people of their milk supply represented by these cows, it is said, would result in weakening public health and individual resistance and therefore, operate to reduce the ability of Germany to fulfill treaty obligations through necessary production.

"As women are defenders of the rights of children," the letter declares, "we embrace with equal sympathy suffering children of all nations. Our sympathy goes out in fullest measure to children in the devastated regions of France, where it appears to us to be urgent that help should be granted as speedily as possible. On the other hand, we see the need of every part of Germany is so great that further reduction in the milk supply would be equivalent to the death sentence for hundreds of thousands of children. In 1918, at the end of the war, the milk which Germany produced annually in peace time, the country is now producing only 8,000,000 lbs."

"For nearly six years the population of German cities have not had milk," the letter says, "and owing to this fact, the death rate from tuberculosis has doubled since 1913, and 20,000 more children died in 1918 than in 1913. In Russia alone there has been an increase in child mortality of 100 per cent. The letter declares these facts are not known to the French because the press has not permitted the information to be made public. The whole question is not one of German good will, the letter says, but of a life and death struggle for German parents, and French women are asked to realize "it is not the right way to save children of one country by destroying those of another."

The letter was framed by a committee of twenty-six women representing bourgeoisie and majority socialist parties in the reichstag, and was reply to an open letter addressed to them by the Woman Suffrage Union of France discussing the German protest against the surrender of German milch cows. The French letter was received by Frau Adele Schreiber, a majority socialist deputy and widely known as a suffragist and welfare worker.

INCREASE IN COTTON

Washington, Dec. 20.—Cotton exports of lint, since Sept. 1, to Dec. 13, amounted to 10,878,265 running bales, including 138,184 round bales, which were counted as half bales; 64,367 bales of American-Egyptian and 1,231 bales of Sea Island, the census bureau announced today.

Compared last year to Dec. 13, 1919, the increase was 1,231 bales.

MANY FIRMS WILL PAY CHRISTMAS BONUSES

A number of local manufacturers as well as banking institutions and commercial houses plan to take the Christmas spirit to their employees in the form of bonuses and profit sharing plans. According to reports gathered, many plants will remember their employees, although hardly as many or in its large amount as last year. Several of the plants called in regard to the matter stated that plans were just being worked out.

Local banks are planning to remember their employees, several on exactly the same basis as last year. The Hamilton National bank and the Hamilton Trust and Savings bank will give each employee a Christmas bonus amounting to something like 5 per cent of his or her yearly earnings, according to C. M. Preston, employees of both Hamilton institutions will hold a social function in the Hamilton club rooms next Wednesday evening.

The First National bank reported that plans for the Christmas bonus to employees are being worked out. The exact figure has not yet been announced. Plans for Christmas are also being considered by the First Trust and Savings bank. A banquet of employees of the Chattanooga Savings bank will be held next Thursday evening at the Patten, when the Christmas gifts to the workers will be announced. The American Trust and Banking company will give a bonus in proportion to the salary of employees. Employees of the institution will have a party in the American club rooms Thursday night. A program of fun and frolic will be carried out.

The question of Christmas bonus to employees of the U. B. Andrews company is now being considered but has not yet been worked out, according to an official of the company. The Chattanooga Medicine company will also give Christmas bonuses, it is understood.

D. B. Loveman company will distribute a Christmas bonus of about \$5,000 among employees of that company, according to announcement by Bernard Loveman. The amount will be distributed in proportion to the salary of the various employees. The bonus will be distributed next week.

CHATTANOOGA CREEK FOUND CONTAMINATED

There has been considerable complaint recently by citizens living in the vicinity of Chattanooga creek concerning sanitary conditions. These complaints have been made to Commissioner Fred B. Frazier of the department of education and health. An investigation was ordered and an investigation was made by Chief Sanitary Inspector Weigle.

Commissioner Frazier states that as a result of the investigation it was discovered that the town of Rossville, Ga., uses the creek to dispose of sewage.

Commissioner Frazier stated that this was not the entire cause of the contamination of the creek as practically every manufacturing plant in, or near Rossville, is equipped with modern sewage systems, and all empty their sewage in to the creek.

He said that the creek also discharges from their bleaching and dyeing tanks considerable filthy substances that not only contaminate, but color the water with a very dark color. This stream empties into Chattanooga creek approximately 300 yards north of the Tennessee-Georgia state line.

On the Tennessee line it was also reported to Mr. Frazier that there are several large concerns that have eighteen-inch sewers emptying into Chattanooga creek near what is known as Hamill's bridge. This is about one-fourth of a mile north of where McFarland's branch enters the creek, where some of the filth is discharged. It was also pointed out that the Chattanooga Gas and Coke company discharges into this creek through an open ditch.

Mr. Frazier pointed out that such a condition has caused this stream to be nothing short of practically an open sewer at its normal stage, and that in order not to jeopardize the health of the community something must be done to remedy this menace.

LITTLE STORIES FOR BEDTIME

Peter Rabbit's Hard Journey.

(BY THORNTON W. BURGESS.)

Peter Rabbit sat in the old stone wall along one side of Farmer Brown's orchard waiting for Mrs. Moon to put out her light and leave the world in darkness until jolly, round, red Mr. Sun should climb up in his blue bedclothes and begin his daily climb up in the blue, blue sky. In the winter Mr. Sun is a late sleeper, and Peter knew that there would be two or three hours after Mrs. Moon put out her light when it would be quite dark. And Peter knew, too, that by this time Hooty the Owl would probably have caught his dinner. So would old Granny Fox and Reddy Fox. Bower the House would be too sleepy to be on the watch. It would be the very safest time for Peter to try to get to his home in the dear Old Briar Patch.

So Peter waited and waited. Twice Bower the House, who had chased him into the old stone wall, came over and barked at him and tried to get at him. But the old stone wall kept Peter safe, and Bower gave it up. And all the time Peter sat waiting he was in great pain. You see, Peter had been caught in a snare set by Farmer Brown, and around one of Peter's long legs was a shiny wire that was so tight that it cut into his flesh and hurt dreadfully, and the other end of the wire was fastened to a piece of wood, part of a stake to which the snare had been made fast, and which had been nailed to a gnarled tree trunk.

It was on account of this that Peter was waiting for Mrs. Moon to put out her light, for he knew that with that stake dragging after him he would have to go very slowly and he could not run any more risk of danger than he actually had to. So he waited and waited. By and by, sure enough, Mrs. Moon put out her light. Peter waited a little longer, listening with all his might. Everything was still. Then Peter crept out of the old stone wall.

Right away trouble began. The stake, dragging at the end of the wire fast to his leg, caught among the stones and pulled Peter up short. Mrs. Moon, who had just made the tea, came. But Peter shut his teeth hard, and, turning back, he worked until he got the stake free. Then he started on once more, dragging the stake after him.

Very slowly across the orchard and under the fence on the other side of Peter Rabbit, his leg so stiff and sore that he could hardly touch it, he crept. And all the time dragging that piece of stake. It seemed to grow heavier and harder to drag every minute. Peter did not dare to go out across the open fields for fear that some danger might happen along the way. He would have no place to hide. So he crept along close to the fence along which bushes grew, and this made the stake was forever catching to the bushes with a yank at the wire end, which brought Peter up short with a sneeze of pain.

This was bad enough, but all the time Peter was filled with a dreadful fear that Hooty the Owl or Granny Fox might just happen along. If he did, he would listen and listen. Over and over again he said to himself, "Don't you, young peach orchard for when I

knelt in Cobham, Va., after a long illness. The funeral took place at Cobham on Monday afternoon. Lanier was respected by both white and colored residents and had many friends, especially among railroad men.

It Made the Tears Come.

knew I had no business there? Why couldn't I have been content with all the good things that were mine in the Green Forest and on the meadows. Oh dear! Oh dear!"

Just as jolly, round, red Mr. Sun began to light up the meadows Peter Rabbit reached the dear Old Briar Patch. Danny Meadow Mouse was waiting on the edge of it anxiously watching for him. Peter crawled up and started to creep in along one of his little private paths. He got in himself, but the dragging stake caught among the brambles and Peter just fell down in the snow right where he was, too tired and worn out to move.

Next story, Danny Meadow Mouse becomes worried.

SUFFERED FOR YEARS

With Bad Stomach and Biliousness.

SYSTONE GAVE FIRST CURE

Chattanooga, Tenn., I suffered with sour stomach, indigestion, and biliousness. I had doctors for several months and spent hundreds of dollars for this trouble. After taking a good course of Systone, I can now eat and drink anything. It gave me my first real cure. My family will never be without Systone as long as it is made. Mrs. Bessie Fatten.

SYSTONE REMOVES THE POISONS FROM YOUR STOMACH AND LIVER. GET A BOTTLE TODAY. THE RESULTS WILL SURPRISE YOU.

INSIST ON SYSTONE. IT WILL KEEP YOUR SYSTEM HEALTHY.

Rupture Kills 7,000 Annually

Seven thousand persons each year are laid away—their bodies buried in the "grave" of the "rupture." Why? Because the unfortunate ones had neglected the signs and symptoms of the disease, and had been merely taking care of the pain, instead of the cause. What are the signs and symptoms? A feeling of yourself by wearing a truss, appliance or whatever name you choose to call it? At first, the truss is only a makeshift—a false prop against a collapsing wall—and cannot be expected to act as more than a mere mechanical support. The trussing pressure retards blood circulation, thus robbing the weakened muscles of that which they need most—nourishment.

But science has found a way, and all truss sufferers are invited to the privacy of their own homes. The PLAPAO method is unquestionably the most successful, rapid and successful method of curing a rupture the world has ever known.

PLAPAO PAD when adhering to the body cannot possibly slip or shift, or of place. Therefore cannot chafe or irritate the skin. It is easy to apply—easy to adjust. It is easy to wear—easy to work and what is more, it is easy to remove or change at will.

Learn how to close the hernial opening, and how to use the PLAPAO PAD. Send for PLAPAO PAD 210 Street Side, St. Louis, Mo., for a trial PLAPAO and instructive information—40 P.M.

The store where women can pick the practical and reliable gift for their men folk--

The average man is not very enthusiastic about the gift that only glitters for a day. He wants something useful, sturdy and beautiful—something that will last—something that "every other man" will not have.

This being a store for men, we specialize in getting the things that a man prefers.

Come to HIS store—this store—a man's store.

—you'll find it not only means reliability and the assurance of man's appreciation and satisfaction but HE will also value your thoughtfulness in coming to HIS store.
